

Milestone AV Technologies completes a critical project 40% (8 months) faster by leveraging EAC's Engineering and Design Group.

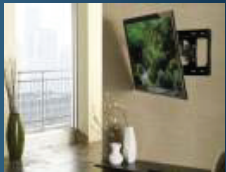

Key Objectives

- Begin design work on an ambitious project suffering from resource constraints.
- Find a trusted partner to deliver a thorough and mature design.
- Maintain client relationships by completing projects on-time.

EAC Solutions

- **EAC's Extensioneering™ Group**
 - Engineering & Design Services
 - Project Management

Customer Benefits

- The project benefited from the diligence, engineering rigor, and advanced technical work delivered by the EAC engineering team.
- Milestone received a mature and well developed design.
- The project was completed on time and within 10% of the project budget.

The most valuable part of partnering with EAC goes back to having faith very early on that the technical rigor and detail was being addressed. I was assured that the EAC team was going to do the diligence necessary to create a good design because of this.
