

Vuforia Studio for Assisted Reality

ACCELERATING INDUSTRIAL PRODUCTIVITY

Vuforia Studio is a powerful, easy-to-use solution that enables industrial customers to rapidly create scalable assisted reality experiences and unlock new possibilities for workforce productivity.

Winning Combination

Assisted reality devices feature glanceable 2D interfaces that provide workers with hands-free, on-demand and real-time information. Typically, creating assisted reality content requires sophisticated tools, expensive resources and long development cycles.

However, Vuforia Studio's visual drag and drop authoring environment, with built-in support for voice navigation, enables users to quickly create 2D interactions for RealWear and Vuzix head-mounted devices without the need for programming.

Now, enterprise stakeholders can easily create scalable user interactions leveraging new or existing 2D content such as: assembly procedure documents, videos and real-time IoT data.

Vuforia Studio helps industrial customers create content quickly and easily”

— Ryan Orwoll, PTC

WHY VUFORIA STUDIO?

Reduce Development Costs:

Eliminate expensive programming resources with:

- An intuitive code-free authoring environment
- Out-of-the box support for voice navigation

Accelerate Content Creation:

Build better experiences, faster:

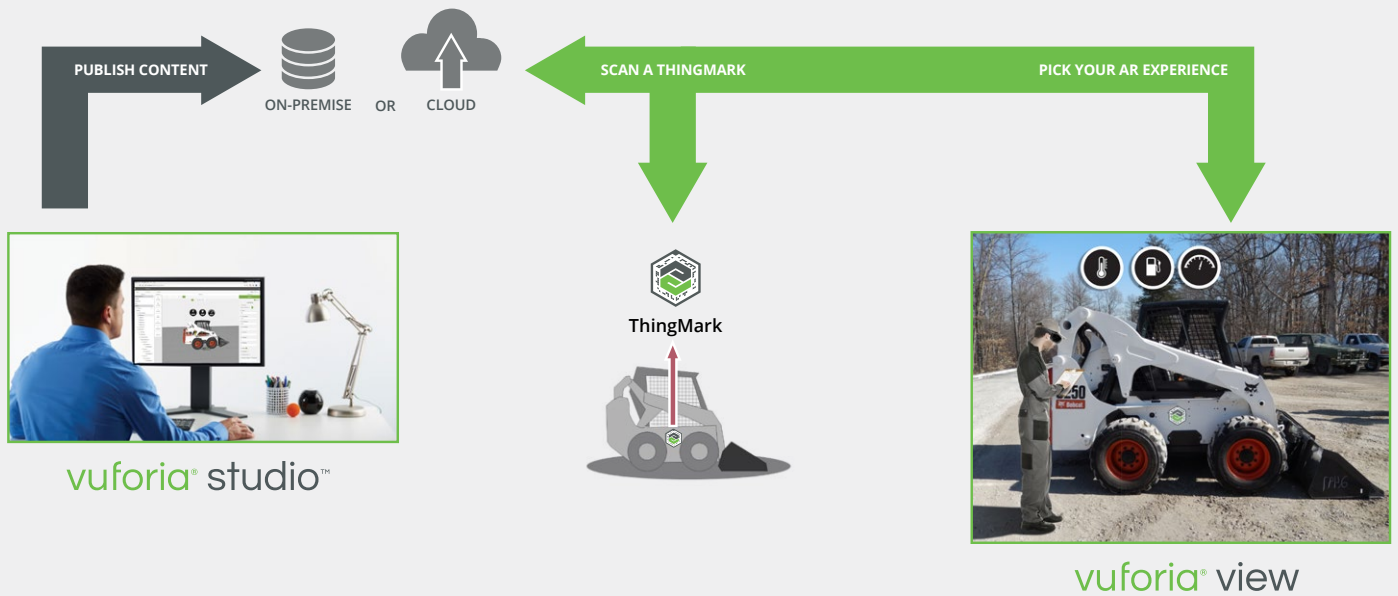

- Efficiently leverage existing 2D content
- Seamlessly incorporate step-by-step instructions and contextualized IoT data

Deliver Enterprise Scalability:

Deliver assisted reality across the enterprise:

- Single universal viewer app with Vuzix and Realwear support
- Flexible cloud or on-premises deployment options

HOW IT WORKS

Limitless Business Value:

Manufacturing, Service, Quality Assurance, Maintenance and Training organizations will benefit from “hands-free” assisted reality experiences created with Vuforia Studio by:

- Increasing the efficiency of service technicians with step-by-step instructions included in repair procedures and workflows
- Quickly providing on-demand reference materials such as documents, videos and links to first-line workers
- Improving quality and safety by providing checklists to guide, track and record step or task completion
- Ensuring worker safety and productivity with built-in voice commands to navigate between screens

Explore the Possibilities:

The Vuforia Studio Free Trial enables industrial customers to gain a competitive advantage. Register today to get early access to tools designed to make assisted reality authoring for the enterprise fast, simple, and scalable.

YOUR FREE TRIAL INCLUDES:

- 30-day access via Trial Portal
- Quick-start guide and tutorials
- Hosted experience server
- Community support
