EAC PRODUCTIVITY APPS FOR WINDCHILL

Improve efficiency with part associations.

This app improves efficiency for users by giving them direct access to drawings and related CAD data without the overhead of PLM & PDM system user interfaces.

The simplified user interface improves adoption and usage. interfaces.

Quickly link directly to files within Windchill. Reduce time spent searching and browsing through the PLM and PDM system.

Part Associations provides a “shortcut” for non-mainstream Windchill users and shop floor personnel to access critical CAD files and documentation associated with part data.

This EAC Productivity App allows users to quickly access all drawings, parts, assemblies, and other documents associated with CAD files and part data. It simplifies searching for content and consolidates results into a single screen.
