

EAC PRODUCTIVITY APPS

Empowering you to view and understand product data across your entire organization

CHALLENGES IN PRODUCT DATA MANAGEMENT

As we work in an increasingly digital world, employees across departments and geographies must collaborate more than ever. Challenges arise from the huge volume of data being generated in disconnected systems for the disparate needs of various roles throughout an organization.

Data is frequently stored across a multitude of systems and portals creating bottlenecks. Different roles have different levels of access, visibility and data combinations. It can be hard to synthesize data in a way that can be understood and used across enterprise systems to promote collaboration.

Data access throughout an enterprise becomes an exercise in hopping between systems, ultimately slowing progress and preventing collaboration.

RISING TO THE CHALLENGE WITH EAC PRODUCTIVITY APPS

EAC Productivity Apps have a direct connection to Windchill and other enterprise systems. Their easy-to-use interface requires almost no training and supports role specific views. They deliver only the information needed to roles across an organization through simple tailoring.

Administrators can easily configure role specific access, visibility and behavior within applications. Groups of functionality are packaged into basic tiles for a simple and logical step-wise flow to product data management.

Key functionality like product and part information search, change request creation and management, task management, reporting and tracking information all flow seamlessly between apps.

► **THINGWORX NAVIGATE**

A single view to Windchill data, giving both the expert and the occasional user access to the latest, most accurate product information when they need it and in the context most related to their day-to-day responsibilities.

► **EAC PRODUCTIVITY APPS**

Expanded applications and functionality built on ThingWorx Navigate to cover additional needs. Our EAC Apps offer simple, role-based access to Windchill data and other enterprise systems that make it easier to view and understand product data.

EAC PRODUCTIVITY APPS FOR WINDCHILL

SUBSCRIPTION PRICING

EDITION	VIEW TIER	AUTHOR TIER
GROUP 1-25 Users	\$2,000	\$4,000
TEAM 26-50 Users	\$3,000	\$6,000
ENTERPRISE 51-100 Users	\$4,000	\$8,000
ENTERPRISE + 101+ Users	STARTING AT \$5,000	STARTING AT \$10,000

All EAC Productivity Apps subscriptions/subscribers must also satisfy applicable PTC Windchill, ThingWorx Navigate, and connected PLM licensing and permission prerequisites. Subscribers must license and install PTC Windchill, ThingWorx Navigate, and other foundational technologies prior to the implementation of EAC Productivity Apps for Windchill. The subscribing company is responsible for any additional licensing and hardware expenses, above and beyond the annual EAC Productivity App subscription fees, required to meet the minimum requirements for a successful EAC Productivity App implementation.

***The preceding content is a guideline and should not be considered a quote, official pricing, or packaging requirements. Due to the way the software licensing and packages changes over time, the minimum requirements at time of sale will apply to all EAC Productivity Apps sales and implementations.*

INCLUDES FREE ACCESS TO
**EAC PRODUCTIVITY
HOME**

EAC Productivity Home is a proprietary framework, or launcher for ThingWorx Navigate applications. It sits on top of Windchill and Navigate to provide a fully configurable and responsive interface.

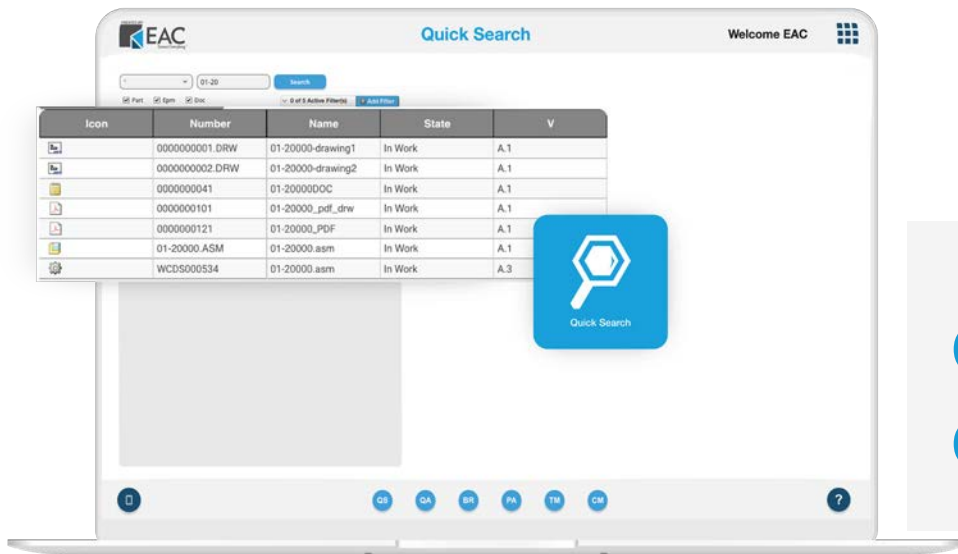

EAC Productivity Home simplifies user interaction and helps administrators maintain the user portal after upgrading to new releases of ThingWorx Navigate.

EAC PRODUCTIVITY APPS FOR WINDCHILL

QUICK SEARCH

This app allows users to easily find items in Windchill. Object oriented technologies like Windchill often require users to specify object types before executing a content search. This requires users to have an understanding of how Windchill objects are related. Quick Search navigates myriad relationships automatically!

Increase user adoption, satisfaction, and PLM system usage.

FINDING ITEMS IN WINDCHILL COULDN'T BE EASIER

Quick Search provides a simple way for users to find content in Windchill. It removes the need for users to apply an understanding of how Windchill objects are related in order to find the information needed to do their job.

This EAC Productivity App allows users to simplify their interaction with an object oriented PLM system. Simply search using a number or attribute and return relevant results from across your PLM environment.

QUICK LINK APPLET

The Quick Link applet allows users to open Quick Search on any text document. Simply highlight text and use the hot key (ctrl + ~) to see results. Admin settings gives the option to automatically download any chosen file extensions.

EAC PRODUCTIVITY APPS FOR WINDCHILL

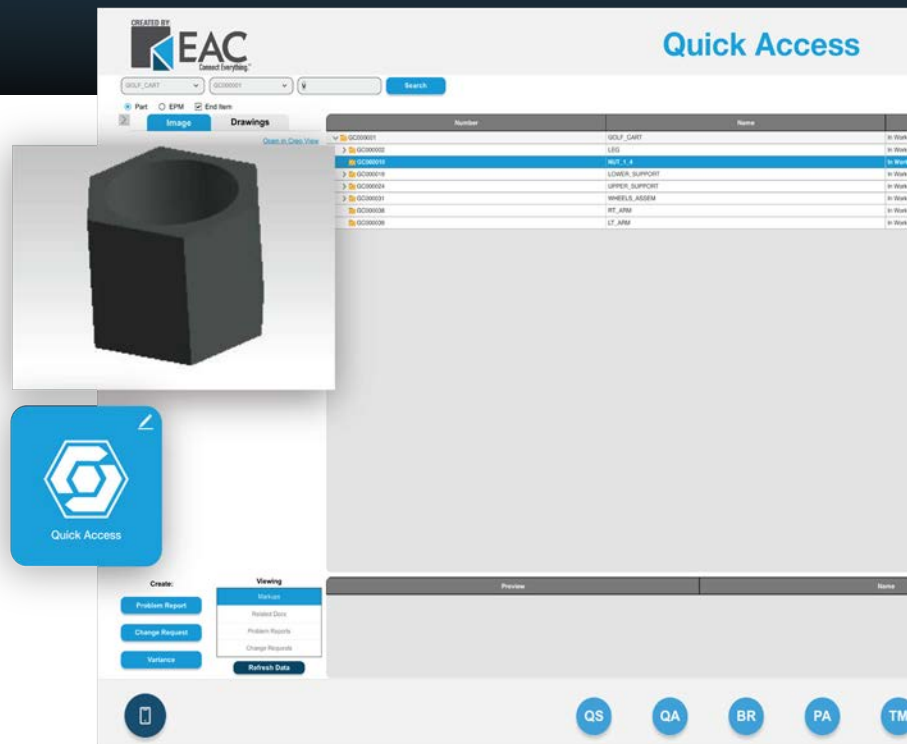

QUICK ACCESS

PLM and PDM tools have complex user interfaces and many relational paths. This can inhibit upstream and downstream user adoption. Quick Access helps improve user adoption of critical PLM and PDM systems.

Quick Access helps organizations improve the return of their Windchill investment by improving user experience and increasing upstream and downstream adoption.

EASILY SUBMIT

- 01 NEW PROBLEM REPORTS
- 02 NEW CHANGE REQUESTS
- 03 NEW VARIANCES

HOW CAN QUICK ACCESS HELP YOU?

Quick Access was created to provide an improved user experience by streamlining access to critical and select data sets to ultimately enhance productivity for shop floor personnel.

With minimal effort, this EAC Productivity App allows downstream users to feed critical quality information back to the engineering department. The simplified interface and consolidated task workflows help users easily submit new problem reports, new change requests, and new variances.

EAC PRODUCTIVITY APPS FOR WINDCHILL

BOM REPORTS

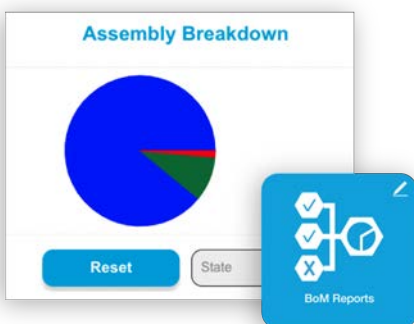

This app allows users to see the progress of a Bill of Materials, and applies filters so you can focus on parts that are not yet released. It is also useful for viewing all of the “make” parts or “buy” parts in a given BoM, or all parts created/modified by a particular user.

The export functionality allows users to execute a specific report on a frequent basis and compare the results to previous exports to check progress over time.

EASILY SUBMIT

- 01** PROCESS OF A BOM
- 02** LISTS OF UNRELEASED PARTS
- 03** PARTS OF CREATED (OR MODIFIED) BY CERTAIN USERS

WHY WOULD YOU NEED BOM REPORTS?

The BoM Report App provides users with a visual representation and detailed listing of the current status of an end item or product. This app displays information about each part contained in the Bill of Materials and groups them in a chart for simple viewing.

This EAC Productivity App allows users to quickly assess a Bill of Material and ensures projects stay on-time and on-track. The simplified view helps to ensure products are built with the appropriate design iterations.

EAC PRODUCTIVITY APPS FOR WINDCHILL

BOM COMPARE

This app provides a side-by-side comparison of two Windchill bill of materials. As companies around the world are using PLM tools, like Windchill, to boost their efficiency and product quality, simplifying their workflow is at the utmost importance. Many engineers don't even realize Windchill comparisons exist. Our BoM Compare application is here to change that.

Now, your teams are able to compare the differences between BoMs of specific parts with the click of a button – taking the manual work out of this detailed task.

THE BENEFITS

- 01 INSTANT ACCESS TO THE CONTENT YOUR ENGINEERS ARE MAKING**
- 02 FILTER BY DIFFERENT TYPES OF ATTRIBUTES**
- 03 CAPTURE MISSING OR NEW PARTS WITHIN AN ASSEMBLY**
- 04 QUICKLY VIEW MISSING COMPONENTS**

BoM Compare

SIDE-BY-SIDE COMPARISONS NOW AVAILABLE

BoM Compare is not only a useful tool for your engineers, it can also be utilized across different departments. Purchasing teams can now guarantee they are ordering the correct parts needed to complete a project while supervisors can easily learn what has changed in an assembly. In order for your projects to be successful, consistent and accurate communication is imperative. This application can help you achieve that.

EAC PRODUCTIVITY APPS FOR WINDCHILL

PART ASSOCIATIONS

This app improves efficiency for users by giving them direct access to drawings and related CAD data without the overhead of PLM & PDM system user interfaces.

The simplified user interface improves adoption and usage. Quickly link directly to files within Windchill. Reduce time spent searching and browsing through the PLM and PDM system.

EASILY SUBMIT

- 01 ASSOCIATED CAD FILES
- 02 ASSOCIATED PART DATA
- 03 ASSOCIATED DRAWINGS

IMPROVE YOUR OVERALL EFFICIENCY WITH PART ASSOCIATIONS

Part Associations provides a “shortcut” for non-mainstream Windchill users and shop floor personnel to access critical CAD files and documentation associated with part data.

This EAC Productivity App allows users to quickly access all drawings, parts, assemblies, and other documents associated with CAD files and part data. It simplifies searching for content and consolidates results into a single screen.

EAC PRODUCTIVITY APPS FOR WINDCHILL

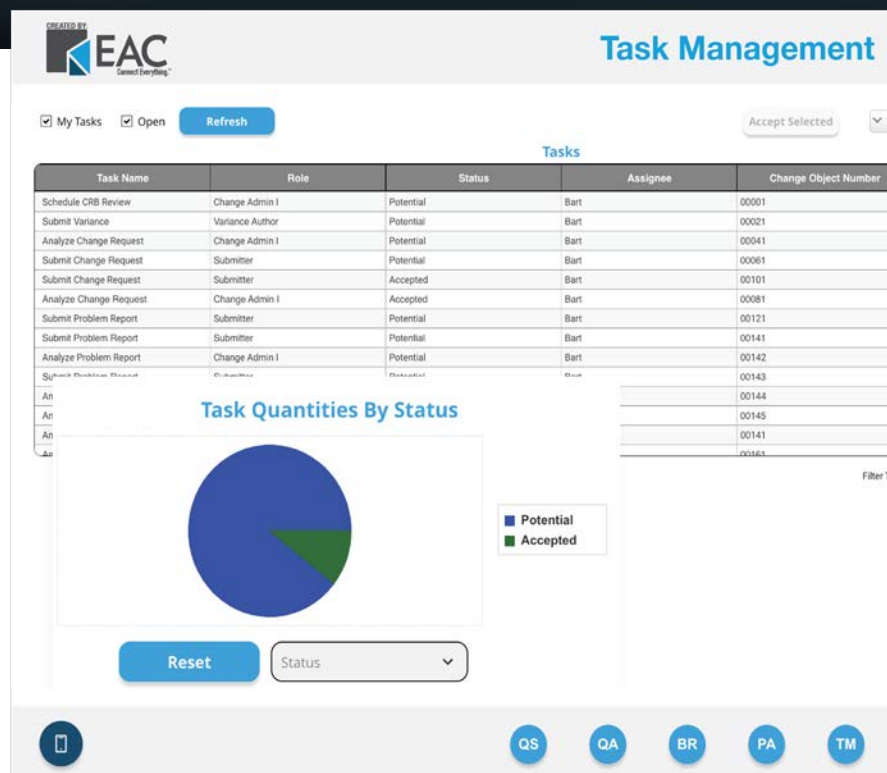

TASK MANAGEMENT

This app improves efficiency for users by giving them direct access to drawings and related CAD data without the overhead of PLM & PDM system user interfaces.

The simplified user interface improves adoption and usage. Quickly link directly to files within Windchill. Reduce time spent searching and browsing through the PLM and PDM system.

EASILY SUBMIT

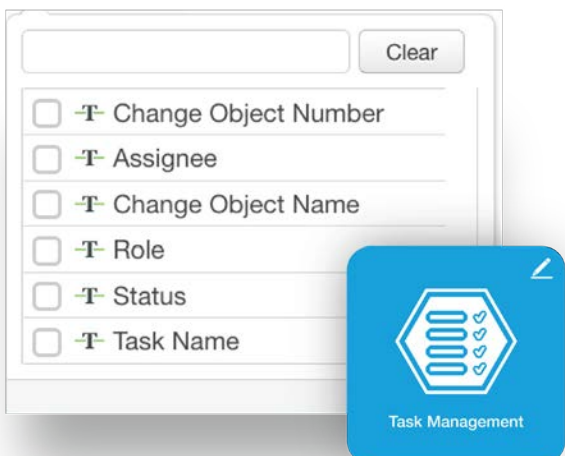

- 01 TASK LISTS
- 02 TASK OWNERS
- 03 FILTERED RESULTS

WHY WOULD YOU NEED TASK MANAGEMENT?

Task Management helps you complete multiple tasks within one window. This app shows all open tasks, almost like a to-do list, and provides the ability to filter tasks assigned to everyone on your team.

This EAC Productivity App allows users to streamline their interaction with a task list. It allows Windchill users to view and manage all tasks on a single screen without needing to create a custom report or advanced search within Windchill.

EAC PRODUCTIVITY APPS FOR WINDCHILL

CHANGE MANAGEMENT

Our Change Management app was built to deliver a graphical view of problem reports, change requests, change reports, change variances, and promotion requests managed within Windchill. This suite of EAC Productivity Apps allows for easy viewing and filtering based on type, ownership, status, and other helpful metrics – all without needing to build complex Windchill reports and searches.

Each app includes a customizable space for the addition and development of role-based reports. This helps managers and end-users throughout an organization see only the most relevant and critical information.

Change Management

Change Management can allow you to filter based on a variety of common attributes (priority, category, state, product category process type, data range, etc.)

Increase efficiency, user adoption, and user satisfaction! Create customizable reports for specific users.

EAC PRODUCTIVITY APPS FOR WINDCHILL

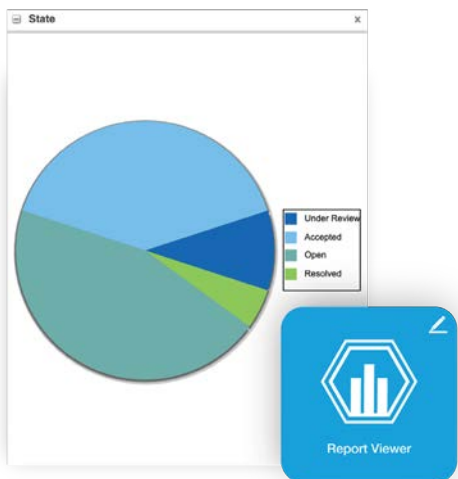

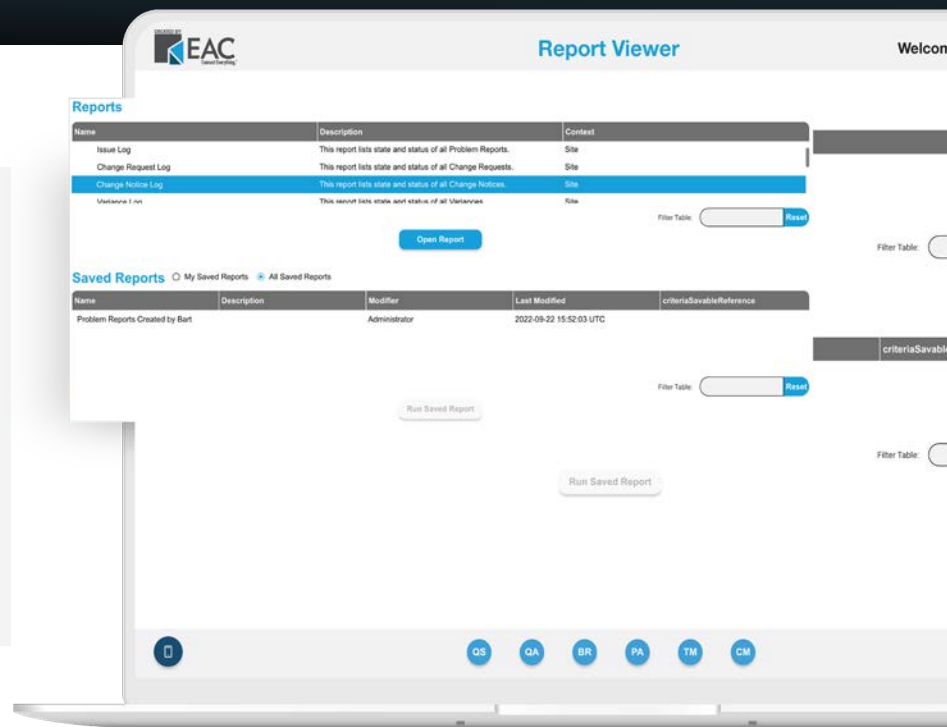

REPORT VIEWER

This application provides a shortcut view into pre-configured reports that are made in windchill – giving individuals outside of engineering the ability to view and run those records. This is especially helpful for those who aren't necessarily familiar with running reports within Windchill, but still want to drive home the idea of change management.

Our Report Viewer application allows users to create pre-configured reports, save new reports, and access pre-built dashboards for reports that leverage the Windchill search engine. Essentially, if it's a report in Windchill, you can run it with this application.

THE BENEFITS

- 01 CREATE PRE-CONFIGURED REPORTS**
- 02 VIEW & RUN REPORTS OUTSIDE OF ENGINEERING**
- 03 LEVERAGE BUSINESS INTELLIGENCE**

AN EASIER WAY TO VIEW WINDCHILL REPORTS

We understand the roadblocks that can happen with Windchill reporting. That's why, we're bridging the gaps between hammering out reports and leveraging business intelligence. With this application, you can identify trends, summarize information about particular objects, identify objects in certain states, and much more!
