COURSE TYPE

Technology

DURATION

3 Hours

DELIVERY METHOD

- Instructor-Led Virtual (Public or Private)
- In-Person Private

DELIVERY LANGUAGES

- English

COURSE OVERVIEW

Explore the Style interface and use surface features to create complex geometry. Modify curves and view the subsequent changes to related surfaces in real time. Identify downstream issues caused by surface quality and how to solve for them, including several ways to handle three-sided surfaces.

PREREQUISITES

Creo: Stitching, Editing, and Solidifying Surface Features

LEARNING OBJECTIVES

- Explore the Style interface
- Create and modify curves
- Create, analyze, and modify surfaces
- Solve for three-sided surfaces
